Paul, based on what you have described in this email, I believe this is the appropriate procedure for the pipes that you encountered, according to the Toxic Substances Control Act.

**Subject:** SW Marine: metal recycling

During excavation, we encountered some pipes that we removed and piled up. We conducted 3 random wipe tests for PCBs on the pipes, and all results were non-detectable. We recommend having the metal recycled, and wanted your concurrence. There is approximately one truck load of metals to be recycled.
